

# Postman Set Up instruction Step

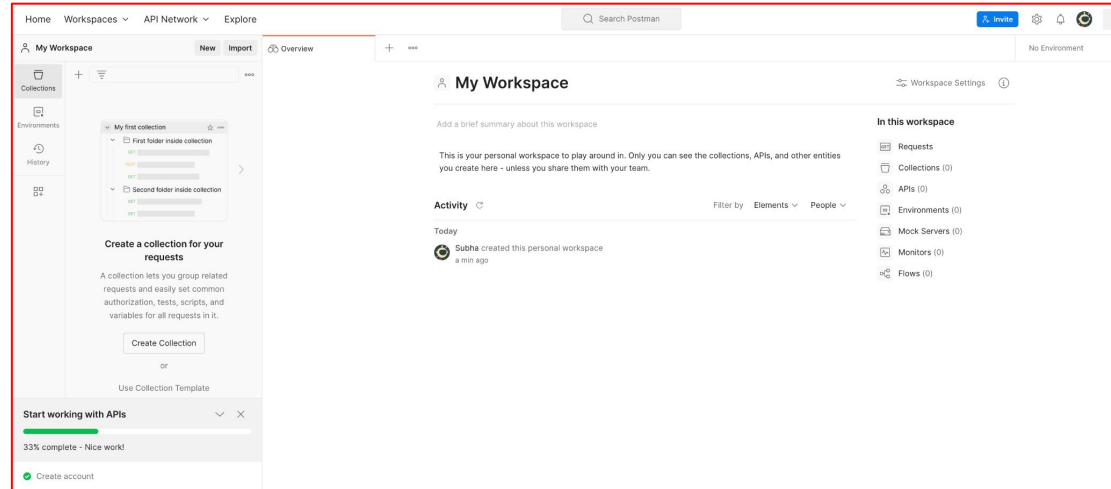

Please follow the below steps to install start with postman for sending messages to the system

**Step 1.** Navigate to [www.postman.com](https://www.postman.com) and click on Create Account . Sign up for a new account.

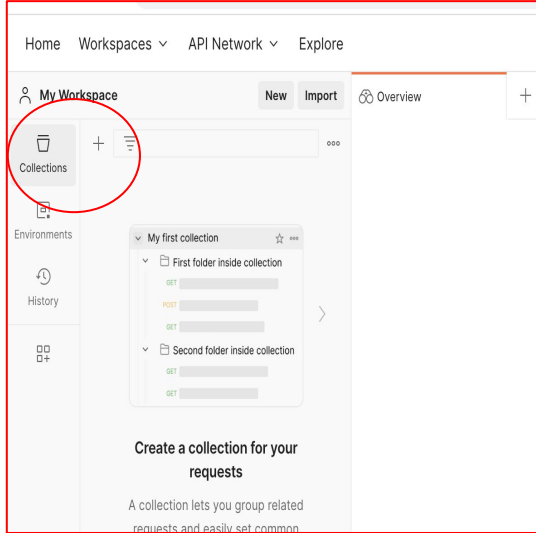

**Step 2:** After creating an account, you will land at below shown page

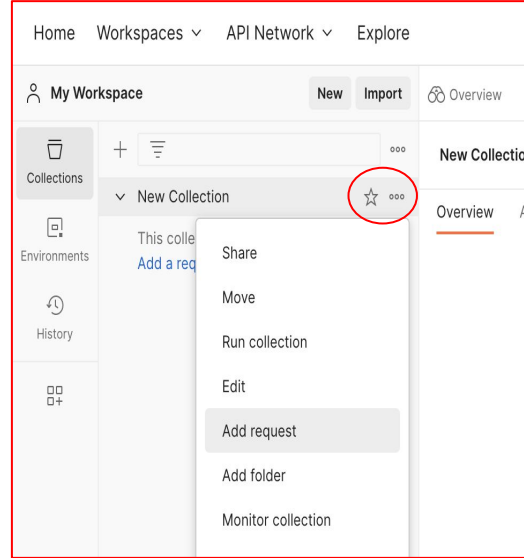

The image shows the Postman Sign In page. At the top, there is a Postman logo (an orange circle with a white rocket) and the text "Sign In" with a link "Create Account instead?". Below this, there are two input fields: "Email or Username" and "Password". There is a checkbox labeled "Stay signed in for 30 days" and a link "Forgot Password?". A large orange "Sign in" button is below the password field. Below the button, there is an "or" separator, a "Sign in with Google" button with the Google logo, and a "Sign in with SSO" button.

**Step-3:** Click on the Collection and New Collection by clicking on “+”

**Step 4:**After adding the collection, add request by clicking on highlighted area.

**Step 5:** Select the POST option and copy paste the code given below in the space mentioned “Enter URL or paste test”

POST

Params Authorization Headers (9) Body Pre-request Script

	Key

**Code to put in for POST message:** ( The code is available in the Github Read Me page.Please copy can from there )

```
curl --location 'https://databricksstreaming.servicebus.windows.net/topic1/messages' --header 'Authorization: SharedAccessSignature sr=https%3A%2F%2Fdatabricksstreaming.servicebus.windows.net%2Ftopic1&sig=dCiyGYjowPsQB1w537yHzAzazWK/IGnWO1I2Xj2GGRM%3D&se=101682055697&skn=RootManageSharedAccessKey' --header 'Content-Type: application/atom+xml;type=entry; charset=utf-8' --header 'x-ms-retrypolicy: NoRetry'
```

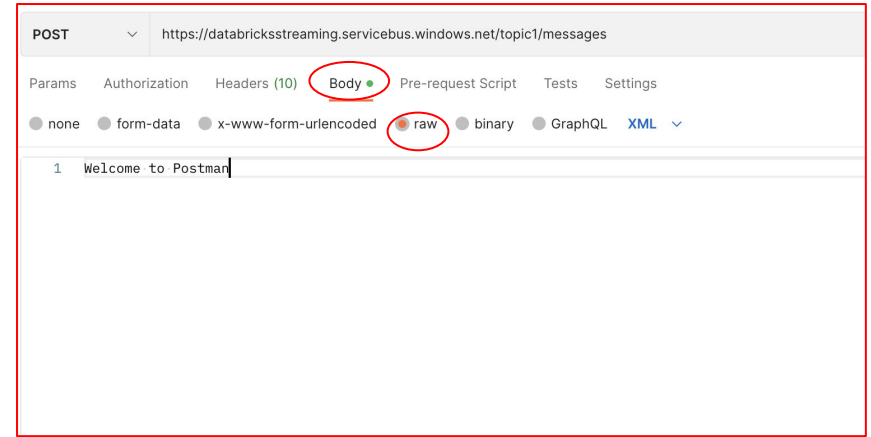

**Step 6:** The header option should appear as below

The screenshot shows the Postman interface with the URL `https://databricksstreaming.servicebus.windows.net/topic1/messages` and the method `POST`. The **Headers (9)** tab is selected and circled in red. Below the tabs, there is a table of headers:

Key	Value
<input checked="" type="checkbox"/> Authorization	SharedAccessSignature sr=https%3A%2F%2Fdatabricksstreaming.servi...
<input checked="" type="checkbox"/> Content-Type	application/atom+xml;type=entry; charset=utf-8
<input checked="" type="checkbox"/> x-ms-retrypolicy	NoRetry
Key	Value

**Step 7:** Click the Body tab and select the raw option, Type in the message and send it whenever you feel so

The screenshot shows the Postman interface with the URL `https://databricksstreaming.servicebus.windows.net/topic1/messages` and the method `POST`. The **Body** tab is selected and circled in red. Below the tabs, the **raw** option is selected and circled in red. The body text area contains the message: `1 Welcome to Postman`.

**Question of the day :** “How is your day going?” . Keep it going through the messages...
